

The maps in this document were prepared using the department centroids identified in the Qualtrics survey sent out to departments during the consultation phase of the Vancouver Scheduling Project. Please note that departments will have the opportunity to make changes to the centroid during Phase 2, which begins in January 2021. A centroid can be identified for each course code that a department oversees.

Primary Zone – buildings within a five-minute walking distance of the department centroid

Secondary Zone – buildings within a ten-minute walking distance of the department centroid

Rooms will be allocated based on class size, room requirements, and other pedagogical needs entered into Web Data Collector during the scheduling process. When allocating rooms, Scientia will first attempt to schedule a section into one of the rooms in a department's primary zone. If none are suitable, it will then attempt to schedule into a department's secondary zone. If no suitable rooms can be found, the section will be scheduled into a suitable room outside of the primary and secondary zones.
